

Isolated Managed Environment

Enhanced Bespoke Security

BOLSTER YOUR DATA SECURITY WITH AN ISOLATED MANAGED ENVIRONMENT

Whilst our FinCalc application provides first class data security out of the box, an Isolated Managed Environment offers you additional peace of mind that your client data is both safe and secure.

BESPOKE SECURITY FEATURES

DEDICATED ISOLATED ENVIRONMENT

We provide you with a company specific version of the FinCalc app hosted on a secure and isolated UK based Microsoft Azure environment, created and maintained by us just for you.

EXCLUSIVE DATA STORAGE & BACK UP

Your client data is stored on a separate Azure SQL database, with reports stored in a separate Azure storage container. Both elements are securely backed up daily.

BESPOKE FINCALC APP

Your bespoke FinCalc app will be accessible only by using a company specific URL. Add your corporate brand to the software screens for further customisation.

MANAGE YOUR OWN UPDATES

Be in control of how and when we deploy system updates. We inform you of the update content and request your consent before it is uploaded onto your copy of the FinCalc application.
